AISA Perth Conference 2016

Registration & Enquires, please contact:
Mourad Khalil +61(0) 403980718 | mouradswork@gmail.com
Daisy Sinclair +61(0) 415780257 | daisyfrancissinclair@gmail.com

CYBER SECURITY - DO WE HAVE IT RIGHT?

Why are organisations so scared? What should they be concerned about? Cloud? Data classification? Malware? Other threats? How is the rest of our region dealing with these issues? How should we manage or change?

This event will help address fears, barriers, roadblocks and perceptions of organisations and individuals around cyber security - "the reality and the myths" - and to ultimately get to the bottom of what are the "real" things to worry about or manage.

Hear from four leading experts on this key topics and cut through some of what you need to know or do. A roundtable discussion and Q&A will be held so come along and ask questions. [More about the event.](#)

AISA invites all individuals with an interest in information and cyber security to become members, see our new member's link below. If on the other hand you or your organisation are keen on sponsoring the AISA Perth Conference 2016 event you may do so through the link.
